BEAUTY TECHNOLOGY

RF · MICROCURRENT · LED · ELECTROPORATION

Established in 2015, we are a one-stop source factory specializing
in ODM/OEM manufacturing of home beauty devices and personal care equipment, serving global brand clients.

COMPANY PROFILE

Company & Scope

Established in 2015, Sparkland Intelligent
Technology Co., Ltd. is a leading ODM/OEM
manufacturer specializing in home-use
beauty devices, hair styling appliances, and
body massagers.

Capacity & R&D

Headquartered in Shenzhen, our 4,450m²
facility delivers a monthly capacity of
300,000 units. We provide end-to-end
solutions from concept design, ID/MD,
and hardware/software development
through to mass production, and our R&D
team specializes in core technologies
including multi-channel EMS control, LED
therapy, and thermal management.

Quality, Compliance & Partnership

Sparkland enforces full-process quality control across IQC, IPQC, and OQC, supporting CE, FCC, and RoHS certifications. We are advancing toward Class II medical-device compliance and ILS social-responsibility audits, and are qualified for international IP collaborations. Backed by strong R&D and flexible manufacturing, we have become a trusted partner for global brands, and look forward to more co-creation, co-production, and co-innovation with partners worldwide.

CORPORATE PARTNERS

Electrical Technologies

Iontophoresis & Disincrustation

A gentle direct current supports ingredient delivery and surface cleansing.

Enhanced ingredient delivery · Skin cleansing

Microcurrent

Low-intensity electrical currents stimulate the skin and help improve its appearance.

Reduced appearance of fine lines · Firmness · Revitalization

Electroporation

Brief electrical pulses temporarily increase skin permeability to support ingredient delivery.

Enhanced ingredient delivery · Improved absorption

Muscle Stimulation

Electrical pulses stimulate repeated muscle contraction and relaxation.

Lifted look · Firmness · Contouring · Firmness · Contouring

Radiofrequency

Radiofrequency energy generates controlled heat to support collagen remodeling.

Firmness · Smoother looking lines · Improved elasticity

BM12 RF EYE DEVICE

A lightweight RF device designed for the eye area.

RF + low-intensity microcurrent + pulsed ingredient delivery

BM19 COMPREHENSIVE FACE DEVICE

An all-in-one device combining RF, ultrasound and light-based care.

Dynamic RF + ultrasound + electroporation

BM13 RF FACE DEVICE

A facial device combining RF, serum delivery, microcurrent and multi-color light care.

RF + electroporation + microcurrent

BM10 MULTI-FUNCTION DEVICE

Combines RF, ingredient delivery, microcurrent and hot/cold care.

RF + electroporation + microcurrent

BM520 MINI MASSAGER

A lightweight device designed to enhance skincare absorption and refine skin texture.

EMS + EP + 630nm Red LED + skin nourishment + enhanced absorption

BM321 SKINCARE INFUSION DEVICE

A lightweight device designed to boost absorption, nourish skin, and refine skin texture.

EMS + EP + 630nm Red LED + lightweight design + long-lasting battery

BM316 2-IN-1 GUA SHA DEVICE

A multifunctional facial device designed to lift, sculpt, soothe, and enhance skincare absorption.

Dual-effect head + ems lifting + 505nm Green LED + warm therapy + 5 intensity levels

BM516 MASSAGE COMB

A multifunctional device designed to relax, lift, and promote scalp and skin health.

Vibration massage + ems lifting + 630nm Red LED + wet & dry use + soft silicone bristles

BM518 BANGS COMB

A cordless styling device designed to smooth hair, style bangs, and create effortless looks.

Fast mch heating + 5 temperature levels + heat-insulated teeth + cordless design

Light Technologies

Red LED · 630~660±10

Supports collagen production and skin repair.

Smoother skin · Skin recovery

Green LED · 505 ± 10 nm

Helps improve the look of discoloration.

More even-looking skin
